

HYNAM POLL MERINOS

On-Property Ram Sale Wednesday 18th September 2024

Inspections from 10:00am | Sale starts 1:00pm

3% rebate to outside agents attending

Based initially on SA bloodlines, with recent infusions from Wallaloo Park, Gunallo, Forest Springs, Ridgway Advance, Richmond and Trigger Vale we have continued to maintain our adult sheep under 20 micron. With our use of ASBV's over the past 6 years we have seen a positive improvement in growth, fat and eye muscle, as well as increased staple length, which allowed us to implement 8 monthly shearing.

Our rams perform successfully throughout the Mallee, Western District, Central and Southern VIC, and Southern NSW. We successfully attended events in Bendigo, Marnoo and Murray Bridge this year.

Hynam Poll Merinos aim to produce dual purpose meaty framed sheep with soft elite wool, offering affordable quality and service.

ASBV'S

ASBVs are generated by data and are indications of an animal's genetic merit for a particular trait. They are predictions on how an animal's progeny will perform based on their specific genes. An ASBV may be different to the animal's physical performance as it is a combination of both genetic and environmental influences.

SELECTION FUNDAMENTALS

At Hynam Poll Merinos we take a balanced approach when classing. We visually assess all animals on body structure, wool quality and skin type. And along with Australian Sheep Breeding Values (ASBV'S) that are obtained we hope to select the best quality rams to improve our ongoing breeding program and to provide to our clients.
